Brackett gives you more filter...and more value!

Exceeds MIL-SPEC F-7194A

BRACKETT AIR FILTERS

Reasons To Choose A Brackett Air Filter

- FAA-PMA approved—88 different models.
- Our patented treated foam has a 98% efficiency rating.
- You replace only the low cost throw-a-way element.
- Easy, accurate servicing by replacement at specified times.
- Readily available to all F.B.O.'s distributed by most major aircraft supply houses.
- Dual stage foam element increases dust holding capacity
- It's a proven filter. Brackett Air Filters (formerly AC) have been in service on aircraft and helicopters since 1968. At present, Brackett Foam Filters are installed as Factory original equipment on 16 current production aircraft and four helicopters.
- Our Foam Filter is unaffected by water (approved for sea planes). It has no pleats to store dirt and is abrasive resistant.
- The cut-a-way shows the exclusive Brackett filter frame safety features.

Don't Neglect Your Air Filter

A quote from Lycoming Flyer

Quote: "Dust or some form of dirt is frequently the principle factor in premature piston ring and cylinder wear. If a worn or poorly fit air filter allows as much as a tablespoon of abrasive dirt material into the cylinders, it will cause wear to the extent that an overhaul will be required."

INSTALLATION TIPS

- In cases where the filter frame is to be attached, occasionally a broken or bent airloc fastener is found. Restoring the ability to secure the filter is of prime importance, any good method of bolting or screwing the frame on is acceptable.
- Check to make sure that the gasket makes good contact around the periphery and it's compressed to approximately 1/2 the original thickness.
- If the element wetting congregates to one end, blot the excess with clean dry cloth. If your installation tools encounter wetting, WD-40 will help with clean up.
- Check and be sure the rest of the air intake is in good shape and look for torn rubber couplings, worn carburetor heat valve, or alternate air doors. With these in good condition, you can feel confident your engine is operating in a clean air environment.
- For continued inservice instructions, reference Form I-194 located on the back side of the Filter Element Bag.

BRACKETT AIR FILTER DOCUMENT I-194

PLACE IN AIRCRAFT RECORDS

CONTINUED AIRWORTHINESS INSPECTION
REQUIREMENTS AS PER FAR 23.1529
AND GENERAL PROCEDURES OF PART 43

INSPECTION INTERVALS: Pre-flight inspections, engine backfire inspection, 100 hour inspections, annual inspections, filter element replacements.

INSPECTION PROCEDURES

- A. Pre-flight inspection: Per Pilots Operating Handbook, check filter assembly for security, damage or 50% contamination of element face. If found report to maintenance personnel prior to flight.
- B. Engine start-up backfire inspection: Prior to flight, check the entire intake system for security or damage. If a fire was present, the downstream face of the foam element will show erosion. If any irregularities are found see Chart I and also refer to the Aircraft Maintenance Manual for the intake system.
- C. At element replacement intervals: With the element removed, inspect the filter grill, filter frame, filter mountings and entire intake system for security, wear and any deformation. Note: On filter assemblies with gaskets, visually inspect inside and outside of frame for any signs of gasket looseness, movement or deterioration. If found refer to Chart I or the proper maintenance manual for your aircraft or component.

PART	REPLACE REWORK		INSTRUCTIONS
FRAME	X		COMPLETE NEW ASSEMBLY
GASKET	X		ON FILTER FRAME, REMOVE OLD NEOPRENE GASKET AND ALL TRACES OF ADHESIVE DOWN TO A CLEAN ANODIZED FRAME SURFACE. USE ADHESIVE 3M#847 OR DOW CORNING RTV-732. COAT ENTIRE MATING SURFACE (GASKET TO FRAME). APPLY ADHESIVE FOLLOWING MANUFACTURER'S LABEL DIRECTIONS. WHEN FRAME AND GASKET ARE PLACED TOGETHER, CLAMP OR WEIGHT DOWN AT .75 LB./SQ. IN. OF CONTACT AREA. ALLOW TO CURE 24 HOURS PRIOR TO INSTALLATION. PRIOR TO REINSTALLATION OF FILTER, CHECK AIRBOX MATING SURFACE FOR IRREGULARITIES. IF FOUND, CORRECT PER MANUFACTURER'S REQUIREMENTS. UPON REINSTALLATION CHECK THAT THE GASKET MAKES 100% CONTACT. THE GASKET SHOULD BE COMPRESSED 50% FOR OPTIMUM SEAL.
GRILL	X		REPLACE WITH NEW GRILL
HARDWARE	X		REPLACE UNSERVICEABLE WITH NEW
SCREEN	X		COMPLETE NEW ASSEMBLY
SCREEN/GASKET	X		COMPLETE NEW ASSEMBLY (ASSEMBLIES USING SCREEN GASKETS PRE 1981; BA-4106, BA-5110 AND BA-8110.)
ELEMENT	X		REPLACE ELEMENT
